DIRECT IP CALL

Direct IP calling allows two parties, that is, a handset and another VoIP device, to talk to each other in an ad hoc fashion without a SIP proxy.

Elements necessary to complete a Direct IP Call:

● Both DP72x/DP73x and other VoIP Device, have public IP addresses, or

● Both DP72x/DP73x and other VoIP Device are on the same LAN using private IP addresses, or Both DP72x/DP73x and other VoIP Device can be connected through a router using public or private IP addresses (with necessary port forwarding or DMZ).

Users can perform IP calls using Star code following the below steps:

1. Pick up the handset and press **Dial key** ✎ .
2. Dial ***47** followed by the target IP Address.
Note: You can enter directly *47 + target IP address, and then press the dial key to initiate the call.

SPEED DIAL

1. Press **Menu** ⊙ to bring up operation menu.
2. Access to **Shortcut** and then to **Speed Dial** sub-menu.
3. Choose the digit keys (2-9) and press **Assign** to specify the number (from the shared directory) to be as speed dial. You can press **Edit** or **Clear Entry** softkeys to modify/delete a speed dial key .
4. Once configured, hold press on the according key to make the speed dial call.

PLAY VOICE MAIL MESSAGES

1. Press "Menu" ⊙ to bring up operation menu.

2. Access to **Voice Mail** 📧 and then select **Play Message** sub menu.
3. Select the account to retrieve your voice messages saved on your voice mail.
